MARE & FOAL 16
H2933CP

ABOUT THE PRODUCT

Mare and Foal 16 was specifically designed to provide balanced nutrition to pregnant mares during the last trimester and to growing foals. During the last trimester of pregnancy, the unborn developing foal requires the highest level of nutrients and calories for growth. Therefore, it is important to support the nutrient needs of the mare, especially in an effort to maintain her body condition as parturition and lactation draws near. Lactation is the most critical time to supplement the mare’s diet, as her caloric and vitamin/mineral requirement will be at its height. Mare and Foal 16 will also provide optimal nutrition to foals from the time they start to nibble dry feed through two years of age. This feed is also moderate in non-structural carbohydrates (NSC; sugar and starches) = 17%.

Features Include:

♦ Highly fortified with vitamins and minerals.
♦ Moderate in starch, but elevated in calories = made with fiber-based ingredients; providing 1.18 Mcal of Digestible Energy (DE) per lb.
♦ Probiotics (from both yeast and bacterial sources), which may enhance the digestive efficiency of the mare and foal.
♦ Alltech’s organic protienated trace minerals (copper, zinc, and manganese) and organic selenium that increases trace mineral absorption and improves mineral status in brood mares and growing foals.
♦ Balanced Omega-6 and Omega-3 fatty acid ratio (2:1), derived from flax seed and rice bran, to aid in cellular membrane function and repair.
♦ Added amino acids to support muscle growth, plus added B-complex vitamins to promote proper immune function, hoof and skin health, and glossy hair and coat.
♦ Caramel flavoring and molasses to entice consumption.

HOW TO FEED

MARES: Feed pellets during last trimester at the rate of 4-6 lbs/head/day. Increase as needed to maintain body condition during lactation up to 8 lbs/head/day. Provide an adequate supply of quality hay or pasture along with white salt and fresh, clean water at all times.

FOALS: In addition to mare’s milk (or milk replacer), foals can have access to pellets as soon as they will nibble dry feed. In creep feeders (where the mare does not have access), gradually increase the amount of pellets that the foal can consume until it reaches an intake of 1% of bodyweight per day. Feed at regular intervals (at least 2 meals per day). When consumption of pellets exceeds 1 % of bodyweight, 3 daily feedings is preferred. Do not allow the foal to consume more than 1.5% of bodyweight in pellets. Provide access to good quality hay along with white salt and fresh, clean water at all times.

CAUTION

Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.

DO NOT FEED TO SHEEP DUE TO HIGH COPPER LEVEL.

UPDATED  FORMULA

6/11
ABOUT THE PRODUCT
Horses that are fed alfalfa hay need a special feed formulated just for their unique situation. *ShowFlake® 10* is a texturized sweet feed that has been carefully formulated to create a balanced ration when fed with alfalfa hay. *ShowFlake® 10* provides the proper balance of protein, minerals, and vitamins for horses in these life cycles: maintenance, training, mares in foal, and stallions during breeding season.

HOW TO FEED
*ShowFlake® 10* should be presented to the horse slowly. A good rule of thumb is to mix 1/2 of the new feed with 1/2 of the old grain mixture for 3—5 days. Afterward, feed according to the following chart. Ample amounts of fresh, clean water and good quality hay or high quality pasture should be furnished at all times. Keep in mind that the chart is only a guideline and the amounts may need to be adjusted, depending on the horse's condition, age, and level of activity.

CAUTION
Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.
ABOUT THE PRODUCT

ShowFlake® Horse is a 12% protein horse feed designed to be fed in conjunction with hay. It is a fortified, textured sweet feed for use as a maintenance feed, and as a feed for pleasure horses, mares, and stallions. Like all of the All★American® products, ShowFlake® Horse contains chelated trace minerals, yucca, biotin, and yeast cultures.

HOW TO FEED

ShowFlake® Horse should be presented to the horse slowly. A good rule of thumb is to mix 1/2 of the new feed with 1/2 of the old grain mixture for 3—5 days. Afterward, feed according to the following chart. Ample amounts of fresh, clean water and good quality hay or high quality pasture should be furnished at all times. Keep in mind that the chart is only a guideline and the amounts may need to be adjusted, depending on the horse’s condition, age, and level of activity.

CAUTION

Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.

DO NOT FEED TO SHEEP DUE TO HIGH COPPER LEVEL.
ABOUT THE PRODUCT

Performance 14 Pellets is a high-energy pelleted horse feed that is fortified with vitamins and minerals with the performance horse in mind. Performance 14 is designed to provide readily available energy and highly digestible proteins to horses under moderate to intense work / training conditions in an effort to maintain body condition and muscle shape.

Performance 14 Pellets contain Alltech’s Yea-Sacc yeast culture, which aids with fiber digestibility, plus chelated trace minerals, beet pulp, and yucca extract (for reduced fecal odor).

HOW TO FEED

Actual amounts to be fed will depend on forage quality, workload, and body condition of the horse. Most horses will maintain good body condition at lower feeding rates due to the digestibility and energy density of the ingredients in this feed. If fed below these recommended levels, an additional vitamin/mineral supplement is required to meet the horse’s nutritional needs.

Horses under Moderate to Heavy Work, Lactating Brood Mares, and Breeding Stallions: Feed at the rate of 5-10 pounds daily. During periods or extremely heavy work, or when forage is poor it may be necessary to increase daily feeding by 2-3 lbs. Introduce and adjust feeding rates slowly, over a 4-7 transition period.

CAUTION

Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.

DO NOT FEED TO SHEEP DUE TO HIGH COPPER LEVEL.

This product has been CERTIFIED by the Montana Department of Agriculture as Montana Noxious Weed Seed FREE.

This product has been CERTIFIED by the Montana Department of Agriculture as Montana Noxious Weed Seed FREE.
ABOUT THE PRODUCT

Performance 14 is a texturized feed that is fortified with vitamins and minerals at just the right levels for performance horses. Performance 14 is designed to provide readily available energy and high digestible proteins to horses under moderate to intense work conditions. Performance 14 contains yeast culture, which aids with the digestion process, high levels of chelated minerals that are more available to the horse, beet pulp, and yucca. Yucca has proven to be especially valuable in the area of odor control and maintenance of the digestive tract pH. Odor control becomes especially valuable to horses that are stalled frequently.

HOW TO FEED

Performance 14 should be presented to the horse slowly. A good rule of thumb is to mix 1/2 of the new feed with 1/2 of the old grain mixture for 3—5 days. Afterward, feed according to the following chart. Ample amounts of fresh, clean water and good quality hay or high quality pasture should be furnished at all times. Keep in mind that the chart is only a guideline and the amounts may need to be adjusted, depending on the horse's condition, age, and level of activity.

DO NOT FEED TO SHEEP DUE TO HIGH COPPER LEVEL.
ABOUT THE PRODUCT

Complete Horse is a 13% protein horse feed designed to be fed as the sole ration to mature horses. It is a processed ration designed to provide all the protein, energy, roughage, vitamins, and minerals that adult horses require. Complete Horse is perfect for stalled horses, horses that frequently travel long distances, or horses that don’t have access to forage. Complete Horse is also great for pack trips into National Forests, State Parks, and National Parks.

HOW TO FEED

Complete Horse is formulated to provide all the protein, vitamins, and minerals adult horses require. Other hay or supplements are not required. Feed Complete Horse at the rate of 1.5—2 lbs/100 lbs of bodyweight/day. To help prevent boredom, feed in 3—4 separate feedings. If horses show a tendency to chew wood, provide an All American® Horse Shine Block in the stable or pasture. The feeding amounts may need to be adjusted, depending on the horse’s condition, age, and level of activity. This point is especially important because a horse being fed Complete Horse may not be receiving any other feed source (hay or other forage). Provide fresh, clean water at all times.

Available in pelleted or wafer form.

CAUTION

Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.

DO NOT FEED TO SHEEP DUE TO HIGH COPPER LEVEL.

ABOUT THE PRODUCT

Senior horses demand a feed that is easy to chew and contains highly digestible nutrients. Senior is pelleted, so the senior horse can readily break down the pellets in the mouth and the digestive tract. Also incorporated in Senior feed is beet pulp, which provides a source of readily digestible fiber and energy. Senior is the perfect feed for mature horses, horses with teeth or digestive problems, and horses with that suffer from dust allergies. Horses in this situation can be fed Senior as their sole ration.

HOW TO FEED

Senior should be presented to the horse slowly. A good rule of thumb is to mix 1/2 of the new feed with 1/2 of the old grain mixture for 3—5 days. Afterward, feed according to the following chart. Ample amounts of fresh, clean water and good quality hay or high quality pasture should be furnished at all times. Keep in mind that the chart is only a guideline and the amounts may need to be adjusted, depending on the horse's condition, age, and level of activity. For extreme teeth problems, Senior can be soaked with water to make a mash.

RANCH-WAY
SANTERO HORSE

H03045TP

ABOUT THE PRODUCT

Santero Horse is a blend of high quality steam crimped oats, steam flaked barley, All ★ American Horse Supplement, and Star*Shine EquiBloom OmegaPack. All★American Horse Supplement provides protein, vitamins, and trace minerals. Star*Shine® EquiBloom OmegaPack is a highly palatable, high fat, mini-pellet that can be fed to horses when enhanced body condition is desired. This supplement contains high-quality lipid-based ingredients that provide a source of omega-3 and 6 fatty acids (such as vegetable fat, rice bran, and flaxseed). Therefore, in addition to increasing body condition, the omega fatty acids in this supplement will improve coat and skin condition, and help in the reduction of pain associated with inflammation. To minimize sugar content in Santero Horse, molasses is not added to the final mixture.

HOW TO FEED

Santero Horse should be presented to the horse slowly. A good rule of thumb is to mix 1/2 of the new feed with 1/2 of the old grain mixture for 3—5 days. Afterward, feed according to the following chart.

ABOUT THE PRODUCT

Outfitter's Horse Wafer is a blend of forages and grains with trace minerals and vitamin A added. Outfitter's Horse Wafers are pelleted in a convenient size that is ideal for feeding in feed bags, troughs, or on the ground, and is easily transported on packing trips.

HOW TO FEED

Feed at the rate of 1.5—2 lbs/100 lbs bodyweight/day. Feeding levels will vary according to the animal’s body condition, age, and level of activity.

CAUTION

Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.

Wheat Midds, Wheat, Soybean Hulls, Dehydrated Alfalfa, Sunflower Meal, Molasses Products, Ground Yellow Corn, Calcium Carbonate, Salt, Vitamin A Supplement, Vitamin D Supplement, Vitamin E Supplement, Flavored, Zinc Sulfate, Manganese Oxide, Zinc Oxide, Tri Basic Copper Chloride, Ethylenediamine Dihydriodide, Cobalt Carbonate.

This product has been CERTIFIED by the Montana Department of Agriculture as Montana Noxious Weed Seed FREE.
Ranch-Way Feeds proudly uses Alltech’s feed additives in the All*American and Defiance horse feed lines. Alltech® is a pioneer in the development, manufacture, application, and support of the biotechnology for livestock and poultry production. The company is one of the most widely recognized and fastest growing feed ingredient suppliers in the world. Alltech’s® sales of yeast culture and extracts, enzymes, organic minerals, biologically active proteins, flavors, and direct fed microbials have

Probiotics / Direct-Fed Microbials (DFM’s)
DFM’s manipulate the microorganisms that naturally inhabit the digestive tract to improve the general health, digestive function, and immune status of the host animal. Ranch-Way uses many sources of DFM’s to promote digestive health, including:

- **Fungal (Yeast):** Saccharomyces and Aspergillus species stimulate the growth of the natural flora that inhabit the rumen (goats, sheep, cattle, camelds) and the hind-gut (horses, pigs, and poultry), particularly those microbial species that improve fiber digestion.
- **Bacterial:** Enterococcus, Lactobacillus, and Bacillus species aid in the break-down of the sugar and starch fraction of the diet and help eliminate the prevalence of pathogens in the GI tract (such as E. coli, Salmonella, and Clostridium).
- **Mannan-oligosaccharides (MOS):** Yeast-based prebiotic that promotes good bacteria in the gut and inhibits certain pathogenic bacteria. Boosts the immune system, decreases the incidence of diarrhea, and maximizes animal health, performance, and growth.

Antioxidants
Antioxidants help the body repair damage caused by free-radical peroxides due to sickness, disease, over exertion, stress, vitamin and trace mineral deficiencies, etc.

- Selenium and Vitamin E (along with copper and zinc) work in tandem to help protect the cells from oxidative damage.
- Ranch-Way uses an organic source of selenium to promote the selenium-dependent enzymes (GSH; GPx1-8) involved in the antioxidative protective system.
- Ranch-Way also prefers a natural source of Vitamin E (d-alpha-tocopherol or RRR-alpha-tocopheryl acetate) as it is more bioavailable to the animal and is retained in the body longer than synthetic sources (dl-alpha-tocopherol or all-rac-alpha-tocopherol).

Organic (chelated) Trace Minerals
Trace minerals (Cu, Zn, Mn, I, Se, Fe, and Co) have critical roles in immunity, reproduction, and normal metabolism for growth and performance.

- Despite routine inclusion of inorganic sources (such as oxides and sulfates) marginal deficiencies can occur, especially where known antagonists or deficiencies exist in forage and water sources.
- Ranch-Way prefers chelated trace minerals that are bound to a protein or amino acid complex to improve trace mineral absorption and mineral status in breeding stock and growing animals.
Horses in different life stages require specific nutrient levels. Because each horse’s requirements vary it is important to choose a feed that is formulated for your animal’s specific life stage, and the forage that is available. Ranch-Way Feeds, has several All★American® horse feeds that are carefully formulated with these requirements in mind.

Each of the feeds in the All★American® line contains the proper amounts of the major and micro nutrients. In addition, All★American® horse feeds contain yucca, biotin, yeast culture, and chelated minerals to improve digestibility and availability of nutrients. These added benefits make All★American® the right choice for you horse’s feed.

After purchasing All★American®, your horse’s diet must be changed gradually. During the first week, blend All★American® horse feed half and half with your old feed. In the second week, keep increasing the amount of All★American® horse feed and decreasing the old feed. It is important to keep the level of pasture of hay fed during and after the transition period consistent to decrease the chance of digestive upset.

After the transition period is over, continue to observe your horse. If your horse is gaining or losing weight, the amount of All★American® horse feed that your horse is consuming will need to be adjusted. Do not increase or decrease your horse’s feed drastically. Make the change slowly over a period of weeks.

Feed All★American® horse feed in at least two feedings per day in addition to hay or pasture. Try to make these feedings as equal as possible. If you are feeding All★American® Complete or All★American® Senior as the sole ration, it becomes extremely important to feed your horse at least two times or more per day. If your horse bolts down his feed, place several large stones in the feeder. This will make the horse work harder to consume his feed, and slow down the rate of intake.

Provide fresh, clean water at all times, especially during times of extreme hot or cold weather. Make sure that horses have access to salt, even when they are not working.

Horse Candy is a highly palatable treat or reward for horses during training or work. Horse Candy is safe for all classes of horses.

HOW TO FEED

Hand feed as a treat or reward for horses during training, work, or anytime.

CAUTION

Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.

DO NOT FEED TO SHEEP DUE TO HIGH COPPER LEVEL.

RANCH-WAY
RANCH-O-MIN 1011
HORSE MINERAL
Sacked M3062AP

ABOUT THE PRODUCT

Ranch-O-Min 1011 Horse Mineral is designed for horses in the harsh climate of the Rocky Mountain region. This horse mineral is the perfect complement to Ranch-Way’s line of All★American horse feeds. Benefits include:

- Alltech’s BIOPLEX® trace minerals ("chelated" Cu, Zn, and Mn), bound to amino acids and peptides, to protect against mineral antagonism, improve mineral absorption, and improve immune and reproductive function.
- Alltech’s Sel-Plex® (an organic source of selenomethionine from yeast), along with a boosted Vit. E concentration, to support natural antioxidant function during times of stress.
- Biotin to support hair and hoof growth and repair.
- Alltech’s Yes-Sacc® (Saccharomyces cerevisiae) to support digestion of the fiber (hay and pasture) portion of the diet.
- Molasses and Apple flavoring to entice consumption.

HOW TO FEED

Ranch-O-Min 1011 Horse Mineral can be fed free choice to all classes of horses. Provide enough mineral in areas where horses graze, drink, and rest. Adult horses should consume approximately 3 oz/head/day, whereas weanlings and yearlings should consume 1—1.5 oz/head/day. Consumption can be controlled by number and location of mineral feeders. Limit feed upon initial introduction.

Available in 15 lb buckets and 25 & 50 lb bags.

ALL★AMERICAN®

EQUINE PASTURE BLOCK

H3767LP

ABOUT THE PRODUCT

*Equine Pasture Block* is an economical way to supplement a free-choice source of all-natural protein to all classes of horses. In addition to protein, *Equine Pasture Block* supplies calcium, phosphorus, salt, essential trace elements, such as zinc, manganese, and cobalt, plus high levels of vitamins A, D, and E. This block is designed to be fed to horses maintained on pastures, particularly during the fall and winter months when the grass is dormant and protein intake may be low. This is a free-choice feeding option in the form of a 33.3 lb block.

HOW TO FEED

Offer the *Equine Pasture Block* at the rate of 1 block per five head of horses in areas where they drink, eat, and rest. For the first week, offer only enough blocks so that each adult horse consumes 1 lbs daily, then feed free-choice so that the average consumption is 2-4 lbs/head/day. Block placement and the number of blocks provided per pasture can control consumption. Provide plain, white salt and fresh, clean water at all times.

Available in a 33.3 lb block.

CAUTION

Store product in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed. This product has been formulated specifically for horses and is not intended for other species.

DO NOT FEED TO SHEEP DUE TO HIGH COPPER LEVEL.

ABOUT THE PRODUCT

*Ranch-O-Lyx Premium Horse Tub* is a value-added, cooked, low-moisture, molasses-based supplement tub with 14% Crude Protein. The protein and energy sources of this product are derived from molasses, corn syrup, dried distiller's grains with solubles (DDGS), corn gluten meal and soy oil. *Ranch-O-Lyx Premium Horse Tub* is a supplement designed for self-feeding situations to all classes of horses on pasture.

*Ranch-O-Lyx Premium Horse Tub* is specially formulated with Zinpro's *Availa-4* complexed (chelated) trace minerals, and ADM's organic source of Selenium, Prospone, and Citristim. *Prospone* is a source of yeast culture which improves fiber digestion. *Citristim* is a mannanoisaccharide (MOS) product that promotes good bacteria in the gut and inhibits certain pathogenic bacteria, thereby maximizing horse health.

*Ranch-O-Lyx Premium Horse Tub* is available in a 60 lb (blue) plastic tub container with a lid.

HOW TO FEED

Place containers in dry spots near loafing areas and water locations. Adult horses should consume 0.5 – 3.0 lbs per head per day. Monitor consumption and move tubs farther away from heavily used areas if consumption is too high and closer to water source if consumption is too low. Consumption will vary depending on whether horses are on pasture or in confined pens, and on age and size of horse. Place one tub for every 5 horses and place tubs far enough apart to prevent dominant horses from controlling more than one block. Horses must be managed so that consumption of this product does not exceed 3.0 pounds per head per day.

*Do not feed to sheep due to high level of copper*

www.Ranch-Way.com
ABOUT THE PRODUCT

Star★Shine® EquiBloom OmegaPack is a highly palatable, high fat, mini-pellet that can be fed to horses when enhanced body condition is desired. This supplement contains high-quality lipid-based ingredients that provide a source of omega-3 and 6 fatty acids (such as vegetable fat, rice bran, and flaxseed). Therefore, in addition to increasing body condition, the omega fatty acids in this supplement will improve coat and skin condition, and help in the reduction of pain associated with inflammation.

For All Classes of Horses. 
Can be fed to Sheep, Cattle, Goats, and Pigs.

HOW TO FEED

Feed Star★Shine® EquiBloom OmegaPack when enhanced body condition is desired. Initially, feed at the rate of 2 to 3 ounces and increase the daily amount until the desired body condition is reached. Do not allow animals free access to this product. Top dress this supplement along with daily ration. Target feeding rate is 0.1% to 0.4% of body weight, depending on condition.

Available in 10 lb buckets, 25 lb bags, or 50 lb bags.

Store feed in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed.

ABOUT THE PRODUCT

**Star®Shine® Resolve** is a comprehensive **new** supplement for horses based on published peer-reviewed research to address two equine-related problems:

1. Reduce sand accumulation in the hind-gut of horses.
2. It may be beneficial to those horses that are sensitive to sugar and starch and have been diagnosed with glucose and insulin imbalances. Horses that are good candidates would be those diagnosed with Cushing’s Disease (hyper secretion of cortisol), Equine Metabolic Syndrome (EMS) and/or are insulin resistant (IR), obese, or chronically laminitic.

The active ingredients in this supplement are:

1. **95% Pure Psyllium Husks** - commonly recommended by veterinarians as a treatment and preventative for sand colic. Husks form a gel-like substance that increases the viscosity of digesta which increases intestinal motility and aids in the expulsion of sand. It has also been implicated with reducing blood glucose and insulin concentrations in horses when fed daily for 60 days.
2. **Chromium Yeast** - recognized as an essential mineral that amplifies insulin’s signal for glucose uptake.
3. **Alltech’s Yea-Sacc** (*Saccharomyces cerevisae*) - the combination of a direct-fed microbial (DFM) along with psyllium may increase large intestine health by increasing motility and reducing the inflammatory effects of sand accumulation.
4. **Magnesium** - a macro mineral involved with cellular energy production and glucose metabolism.
5. **Cinnamon** - may aid with glucose metabolism at the insulin receptor level.

Cinnamon and green apple flavoring will entice consumption.

HOW TO FEED

**Star®Shine® Resolve** is a supplement that should be mixed with the regular grain ration.

To address sand accumulation in the hindgut of horses, initially offer ~1 scoop (3.5 oz) twice daily (total of 7 oz in two separates meals along with regular hay and grain ration) for 28-32 consecutive days. Thereafter, for monthly maintenance, offer ~1 scoop (3.5 oz) once daily for 5-7 consecutive days.

To provide comprehensive support of metabolic imbalances, offer ~1 scoop (3.5 oz) once daily (along with regular hay and grain ration) for 60 consecutive days.

INGREDIENTS

Psyllium Husks, Magnesium Oxide, Ground Dehy Alfalfa, *Saccharomyces cerevisiae* (Yeast Culture), Chromium Yeast, Green Apple Flavoring, Cinnamon.

Available in 4 lb bags, 10 lb pails, or 50 lb bags.

CAUTIONS

For use in horses only, do not feed to animals raised for human consumption. An examination from a veterinarian is recommended prior to using this product. The effects of this supplement may be contradicted in those horses diagnosed with hypoglycemia or hypoinsulinemia, RER (recurrent exertional rhabdomyolysis), or EPSM/PSSM (equine polysaccharide storage myopathy).

Store feed in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed.

1-800-333-7929
www.Ranch-Way.com
ABOUT THE PRODUCT

Star®Shine® 26% Protein Pellets is a highly palatable protein, mineral, and vitamin supplement for all classes of beef and dairy cattle, horses, sheep, goats, rabbits, swine, and poultry.

HOW TO FEED

Dairy calves: Feed 1 lb daily after weaning.

Beef calves: Feed 1 part Star®Shine® 26% Protein Pellets with 9 parts grain as a creep ration.

Horses: Feed 1—2 lbs daily during periods of heavy work or when preparing for show.

Foals: Feed 0.25—0.5 lb daily.

Sheep and Goats: Feed 0.5 lb daily during the last third of gestation and during lactation.

Rabbits: Mix 1 lb Star®Shine® 26% Protein Pellets with 20 lbs regular ration when preparing the rabbit for show.

Swine: Feed 0.5—1 lb daily to sows for 2 weeks prior to farrowing and during the first 2 weeks of lactation. Feed boars 0.5 lb daily during heavy use periods.

Poultry: Add 3 lbs Star®Shine® 26% Protein Pellets / 150 birds/day to breeder rations daily.

Available in 10 lb buckets, 25 lb bags, or 50 lb bags.

12/10

Store feed in a clean environment free of moisture, rodents, insects, and other pests. Do not feed moldy or repugnant feed.
ABOUT THE PRODUCT

**Calf-Manna** is a proven concentrated supplement for several species of animals that, when added to ordinary daily rations, makes a big difference in overall performance. **Calf-Manna** is fed to everything from growing and performance horses, to cattle, rabbits, goats, poultry and swine.

HOW TO FEED

- **Dairy Calves**: Up to 1 lb per day
- **Lactating cows**: 1-1 1/2 lb per day
- **Beef Calves**: 10% of the creep ration
- **Show Cattle**: 1-2 lbs per day
- **Brood Cows**: 1 lb per day
- **Bulls**: 1 lb per day
- **Foals**: 1/2 lb per day
- **Growing Horses**: 1-1 1/2 lb per day
- **Performance Horses**: 1-2 lbs per day
- **Broodmares & Stallions**: 1 1/2—2 lb per day
- **Goats**: 1/4—1/2 lb per day
- **Baby Pigs**: 1/8—1/4 lb per day
- **Show Hogs**: 1/2—1 lb per day
- **Gestating Sows**: 1/8—1/4 lb per day
- **Lactating Sows**: 1/2—3/4 lb per day
- **Boars**: 1/4—1/2 lb per day
- **Rabbits (Growing)**: 1 teaspoon per day
- **Rabbits (Lactating)**: 1 tablespoon per day
- **Poultry**: 1 tablespoon per day or 5-10% of the ration

ABOUT THE PRODUCT

*Mare’s Match®* is the ideal milk substitute for foals. *Mare’s Match®* can be used as a replacement for milk when mares will not allow foals to nurse, foals are from sick mares, foals have an inadequate milk supply, or when the mare dies.

MIXING INSTRUCTIONS

Use plastic cup provided to measure powder. Each cup holds 0.25 lb of powder. Mix 1 level cup of *Mare’s Match®* milk replacer in 1 quart of 110°-120°F water by slowly adding powder to the water while stirring. Feed at a temperature of 90°-100°F.

HOW TO FEED

**Always provide clean and fresh water at all times**

Feed *Mare’s Match®* according to the following chart. At two weeks of age, begin feeding All Star® American® Foal 16 and good quality forage.

<table>
<thead>
<tr>
<th>Age of foal</th>
<th>No. of Feedings (per day)</th>

INGREDIENTS

Dried Whey, Dried Whey Protein Concentrate, Dried Whey Product, Dried Skimmed Milk, Dried Milk Protein, Animal Fat, Natural Mixed Tocopherols, Amorphous Silicon Dioxide, Citric Acid, Soybean Oil, Rosemary Extract, Lecithin, Vitamin A Acetate, Vitamin D₃ Supplement, Vitamin E Supplement, Thiamine Mononitrate, Riboflavin, Niacin Supplement, Calcium Pantothenate, Biotin, Ascorbic Acid, Pyridoxine Hydrochloride, Folic Acid, Vitamin B₁₂ Supplement, Choline Chloride, Calcium Silicate, Calcium Carbonate, Manganese Sulfate, Zinc Sulfate, Ferrous Sulfate, Copper Sulfate, Cobalt Sulfate, Ethylenediamine Dihydriodide, and Selenite Yeast.

Available in 20 lb buckets.
ABOUT THE PRODUCT

**Land O Lakes® Mare’s Match®** Foal Milk Transition Pellets are part of that equation. **Land O Lakes® Mare’s Match®** is a milk based supplement designed to provide you young foals and weanling horses with palatable, scientific nutrition that’s part of a flexible successful nutritional feeding program.

**Benefits:**
- Provides nutritional boost for maximizing foal growth.
- Milk based nutrition helps aid in transition from milk to grain.
- Provides highly digestible fat source to help meet foal energy requirements.
- Has balanced nutrition including calcium, phosphorus and trace minerals.
- Foals like it! Palatable nutrition to help provide a healthy, energetic foal.

**HOW TO FEED**

**Always provide clean and fresh water at all times**

**Orphans/Early Weanlings:** Can be fed free-choice up to 2 pounds or 4 cups* per day. Recommended that feed be weighted.

**Nursing Foals:** Feed free-choice up to 1.5 pounds or 3 cups* per day.

**Weanlings/Yearlings:** Feed normal protein roughage/grain ration. If additional condition is desired, feed 0.5 to 1.5 pounds (1-3 cups daily).

**Broodmares:**
- **Gestation:** Depending on the condition of the mare, supplement the mare’s ration with 0.5 to 1.5 pounds (1-3 cups) of **Land O Lakes® Mare’s Match®** Foal Milk Transition Pellets daily. Do not allow the mare to become fat.
- **Lactation:** If supplementation is needed, feed 0.5 to 1.5 pound (1-3 cups) daily depending upon the condition of the mare.

**Performance Horses:** Supplement the ration with 0.5 to 1.5 pounds (1-3 cups) daily to maintain condition.

* Cup enclosed in the package holds approximately 0.5 pounds of **Land O Lakes® Mare’s Match®** Foal Milk Transition Pellets. Gradually increase feeding rate over time.

Available in 25 lb buckets.
**ABOUT THE PRODUCT**

*Wyoming Alfalfa Hay Cubes* offer the horse owner a way to supplement or replace hay and pasture, while eliminating the concerns of nutrition, availability, and potential respiratory problems arising from bad forage.

*Wyoming Alfalfa Hay Cubes:*

- Less loss than loose hay
- Certified weed-seed free
- Easy to Handle
- No twine or baling wire
- Easy to store
- Cost effective

**HOW TO FEED**

If replacing all the hay in the diet, feed 1% to 1.5% of bodyweight per day in hay cubes. If feeding as a supplement to hay, feed 4 to 6 lbs of cubes per day. Cubes can be soaked in warm water to loosen for older horses, horses with bad teeth, or for horses prone to choking. Always provide plenty of fresh, clean water at all times. Keep product fresh in cool, dry storage. Store cubes off the floor and out of direct sunlight. Examine product daily for mold or insect contamination. Do not use product that is old, molded, or insect contaminated.
